

LAZIZAL®

ADVANCED FACE LIFT SERUM

HOW TO USE SERUM LAZIZAL® ?

You can use serum LAZIZAL® on your own - in the morning or on special occasions.

If you are using both LAZIZAL® products - the cream and serum, it is recommended to use the serum in the morning and the cream in the evening, after cleansing your face from the makeup and serum. Serum LAZIZAL® can be used before an important event.

HOW TO APPLY THE SERUM

Before the first use, twist the bottom of the syringe from the closed to the open position.

1 | Shake well before use.

2 | Apply a small amount (about 0,2-1 ml) on the hand.

3 | Apply locally on the wrinkles and/or bags under the eyes, gently tapping (not rubbing), avoiding the eyes area.

4 | After application, limit the face mimics for about 30 seconds. Then wait for about 10-15 minutes until complete absorption of the preparation. Fanning speeds up the process of serum absorption.

5 | Now your skin is appropriately prepared for applying makeup. It is allowed to change the sequence of applying the preparation: apply makeup, then gently tap the serum - locally, in areas where wrinkles are present. At the end, you can powder your face. It is recommended to use powder makeup products.

Important: if too much serum is applied, there may be some white deposits on the skin. To get rid of them, collect the excessive serum using a dry cotton pad.
